Cottage Gardens "Started" Garden ROSES

STARTED in 6-inch Pots for SAFE Transplanting into Your Garden

We are proud of the results and the pleasure that has been obtained from our roses. Because of the great interest in our started roses, we suggest that you place your order early, so we can reserve the varieties you wish. Telephone 29021.

Why We Offer Potted Roses

Instead of requiring part of the spring and often summer to get rooted and established in your garden, our Roses, started in pots during the winter, can be planted in your garden and start blooming right away.

Because of their early start in large 6" pots, our potted roses develop a splendid root system and naturally go through the next winter easier.

PLANTING. Many years have proven that in the spring, our Rose Customers are best served with ROSES from large pots, having been started during winter and kept in cold frames where they can make roots in advance of the growing season. Such plants are sure to grow and bloom. Just tip the plant out of the pot, being sure not to break the "potball" as this would disturb the roots. The soil in which they come has already been enriched, but it is well to mix some well decayed cow manure or Driconure into the soil with which you are going to surround the plant. Plant so that the place where the rose was budded (at start of "fork") is covered with about 2 inches of soil.

Everblooming Hybrid Tea Roses

AMI QUINARD, blackish maroon opening rich velvety red, with black luster, non fading. Delightful fragrance..... \$ 1.75

ANGELS MATEAU, (Pat. No. 174). Large full petaled flowers of soft orange-pink. 2.00

PEATMOSS AND DRICONURE

FOR YOUR ROSES. Peatmoss encourages fibrous roots, "aerates" the soil. Driconure is the next thing to cow manure.

PEATMOSS, bale	\$ 5.95
DRICONURE, 100 lb. bag	\$ 3.95
DRICONURE, 50 lb. bag	\$ 2.50

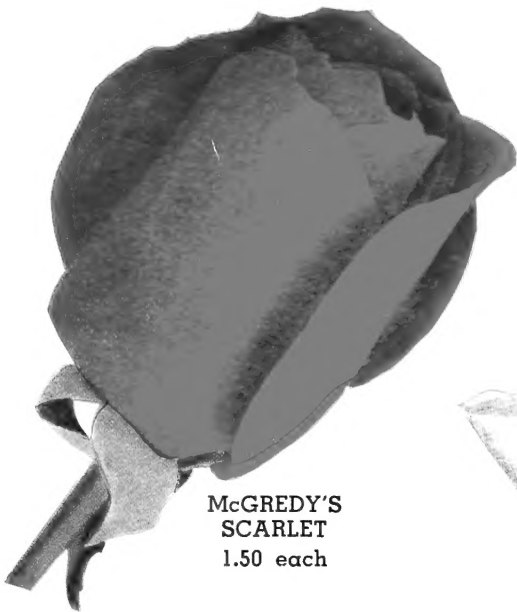

WHAT THE A.A.R.S. MEANS TO YOU

A.A.R.S. signifies that the rose in question has been chosen by rose connoisseurs as an outstanding rose the year of its introduction. When you buy a rose bearing this insignia, you are assured that that rose will meet all specifications for one worthy of merit in your rose garden.

DuPONT FLORAL DUST

This one product will give complete protection to your roses from both insects and diseases. May be used as a dust or easily mixed with water for spraying.
